## Water Lilies

Interest in water gardens is growing rapidly, and there are sound reasons for it. As the principal feature of interest in the small garden, a pool answers admirably. It can be made to harmonize with either natural or formal styles, and fits well into most designs. It will furnish a home for goldfish, and other aquatic animal life, while the bog plants and water lilies which can be grown in it have both beauty and strangeness to attract all. Garden makers are learning how easy it is to grow water plants and how richly they reward them.

# Lohrman's Evergreen Lawn Seed

Produces a perfect as well as permanent lawn of luxuriant richness. It quickly forms a closely interwoven, firm and elastic turf ready for cutting in about six weeks from time of sowing. This mixture is the result of years of experimenting and is composed of the proper proportions of fine-leaved, deep rooting, perennial grasses which will thrive under varied conditions of soil and climate; maintaining a succession of growth during the different seasons of the year, thus insuring a rich, deep green, smooth and velvety lawn, free from clumps. Lb., 45c; 3 lbs., \$1.25; 5 lbs., \$1.95; 10 lbs., \$3.75; 25 lbs., \$8.15; 100 lbs., \$32.50.

## How to Make a Lawn with Evergreen Lawn Seed

**Preparation of Soil.** Dig the soil about 6 inches deep, but only when it is dry. Rake until soil is smooth and in fine condition.

**Fertilizing.** Use complete **Plant Food**, an odorless fertilizer, at the rate of one-half ton per acre, 50 lbs. per 1000 square feet, 5 lbs. per 100 square feet.

**Sowing the Seed.** Sow our **Evergreen Lawn Seed** at the minimum rate of 100 lbs. per acre or 1 lb. to each 300 square feet. Bury the seed not more than one-eighth inch deep. Roll the seeded area, but should rain fall before the work is completed, defer the rolling until the land has dried.

**Grass for Shady Locations.** Follow the above directions but use our **Shady Lawn** instead of our **Evergreen Lawn Seed**.

**Renovating an Old Lawn.** First—Rake the lawn well, removing as much dead grass as possible. Second—Apply fertilizer according to the above directions. Third—Sow our **Evergreen Lawn Seed** at the rate of 50 lbs. per acre or 1 lb. per 600 square feet. Fourth—Either rake the lawn lightly or roll it in order to cover the seed.
